ORIGINAL

Company: Tucson Electric Power Company

Division: Electric

Nature Of Opinion:

Docket Number: E-01933A-12-0291

Docket Position: Against

The rates for Distributive Generation (DG) should not be place so low as in the decision for E-01933A-12-0291. This will discourage citizens from installing solar power systems due to the extended length on their return on investment of the system. As an owner of a solar power system, I do not want a lower rate for the power I generate. The more citizens that have solar power systems, the less energy Tucson Electric Power (TEP) has to produce which means less coal being burned. It would behoove TEP to adjust their power generation plan to embrace renewable energy. Solar power systems should be encouraged, and a lower rate for the power generated will counteract that effort. Moreover, it will hurt small LOCAL solar power installation and service businesses. Under NO CIRCUMSTANCES should any rate change be retroactive! Thank you for your time in reading my opinion on the matter.
